

Clima Flow is the Tecniplast IVC Air Handling Unit with humidity control featuring an accurate regulation and maintenance of the intra-cage air parameters.

Clima Flow guarantees animal welfare through an increased consistency of environmental conditions for cage inhabitants, making for more reliable research outcomes.

FULL CONTROL OF IVCs AIR PARAMETERS

Clima Flow is purposely designed to guarantee a **strict control of the IVC air, including regulating its humidity**, with the renowned reliability of the Tecniplast Air Handling Units.

ENERGY SAVER & ENVIRONMENTAL FRIENDLY

Clima Flow treats the minor volume of air strictly needed by the IVCs. As a consequence, by conditioning a smaller amount of air compared to that needed for the whole room, it **reduces the facility running costs through a “green” approach**.

FLEXIBLE

Standalone solution that allows an easier refurbishment/enlargement of existing facility, especially where modification or expansion of the existing HVAC is not possible or prohibitive in terms of costs or building capability.
