ARIA PASS THROUGH BOX

Effective barrier

The new ARIA Pass Through Box is designed to transfer materials and working tools between areas classified with different air cleanliness and, at the same time, keep them separate.

BENEFITS

- Increased flexibility: two different models available (static or ventilated) and with or without base to meet the different installation requirements of your facility
- Top Safety: electromagnetic interlocking doors with LED light control preventing both doors from being accidentally opened at the same time
- **Enhanched Visibility:** anti UV-C tempered glass screen provides a clear view of the internal chamber
- **User-Friendly:** 4.3" touch screen which allows you to easily access any function, improving and simplifying the setting procedures.

PERFORMANCE

- Class H14 HEPA filter: typical efficiency of 99.995 % MPPS according to CEN EN 1822.
- ISO Class 3 Air Quality according to ISO 14644-1 for an increased air cleanliness
- Automatic regulation system to keep the airflow speed in the work chamber and the recycling/extracted air ratio constant, even with the progressive clogging of the pre-filter & HEPA filters
- Perforated stainless steel diffuser to protect the HEPA filter and guarantee a uniform down flow air along all the working area (average speed 0.36 m/s - 70,86 fpm).

STANDARD FEATURES

- Main body made in stainless steel AISI 304L and Scotch **Brite finishing** to improve the cleanability
- Removable work surface & Liquid collection tray to collect the extra disinfectant
- Pre-filters (ISO Coarse ≥60% as per ISO16890; G4 as per EN779) to extend the H14 HEPA filter life span
- 24V DC centrifugal motor blower ensures higher efficiency & performance, extends life of the Pass Through and reduced maintenance.
