

# 1991-2021: IWT TURNS 30!

Three decades at the service of washing, decontamination and automation

September 13, 1991: 30 years ago, IWT was officially established. Retrace with us the milestones of our thirty-year history in the timeline below.

TECNIPLAST FOUNDATION

SINCE 1949

1991

**IWT FOUNDATION**  
IWT was founded in 1991, in order to better focus on LAS cleaning requirements

**1<sup>ST</sup> RACK WASHERS**  
IWT launched their first innovative rack washers with unprecedented throughput and energy efficiency

1993

1999

**1<sup>ST</sup> AUTOMATION**  
IWT started to integrate in-house their washers with robotics systems to enhance efficiency, ergonomics and operator's allergen protection

**IWT 1.0**  
IWT invested significant resources in an ambitious expansion plan of their production and offices

2000

2001

**1<sup>ST</sup> DECONTAMINATION**  
IWT introduced in the LAS market dedicated VPHP chambers for the decontamination of LAF equipment essential for the IVCs management

**IWT PHARMA DIVISION**  
IWT designed and developed their first full GMP part washer to serve the stringent Pharma manufacturing needs

2008

2014

**RED WASHERS GENERATION**  
IWT launched the RED WASHERs generation, cutting edge technology equipment with top in class efficacy and efficiency for the best user experience

**IWT 2.0**

IWT invested in a major expansion plan aimed at further enlarging the production capabilities and improving lead times. New headquarters with over 500sqm – 5300sqft of tech center for client's demos, training and live testing activities either in presence or digitally connected

2019

2021

**IPS IMPLEMENTATION**  
IPS (IWT Production System) is to foster product quality through structured production processes, improving ergonomics and work safety while eliminating non-value added activities
