

Buguggiate, June 6, 2020

We would like to welcome you to Tecniplast Italy again!

We are delighted to be able to welcome customers to Tecniplast. We have made this decision following the lifting of lockdown restrictions across Europe. We understand that Airlines will resume many European flights soon.

Tecniplast was listed as 'essential manufacturing' and we kept the factory open and fully operational during the lockdown period. In order to keep manufacturing open Tecniplast was not only fully compliant with the Authorities by implementing their recommendations, but we took a pro-active approach by putting in extra preventive measures such as staggered lunch breaks, working from home policies etc.

Our factory tours give you the unique opportunity to experience how our products are brought to life – from the metal or moulding departments to the assembly lines. At our state-of-the-art production facilities, you can see how skilled technicians and sophisticated machines work seamlessly together to produce some of the most important products in the LAS sector, from the powerful Green Line cage to the Innovative DVC system.

The layout of the Factory Tours has not changed, we have ensured your safety by following all the Authorities procedures, risk assessments and recommendations to avoid any cross contamination and help visitors, employers and workers stay safe and healthy in this innovative working environment. The main difference you will see is the **welcome at the reception**: you will receive a new leaflet, clearly stating our procedures and our business card.

To summarize the following Corona Virus recommendations are being implemented:

- Ensure to keep a minimum interpersonal distance of at least 2 meters
- It is mandatory to wear face masks
- Hygiene precautions are mandatory, especially for hands
- Wear appropriate PPE equipment

We look forward to seeing you soon!

Pietro BERNARDINI
Managing Director
