Introduction

Tecniplast has developed a series of liners to be used inside existing plastic cage bodies. Those are made of a very **thin layer** of polyethylene stackable one inside the other.

1/Combining the Advantages of Durable and Disposable

Tecniplast disposable cage liners are designed to be used in a durable plastic cage, **combining** the solidity and reliability of a **durable** plastic cage with the advantages of a **disposable** one.

2/Flexibility

The liners have been developed in order to address unmet market needs for special applications such as:

- Irradiation studies
- Imaging
- Toxicology studies
- Quarantine
- Disaster planning

3/Cost Effective Solutions

Disposable liners can be used in specific situations, in contingencies where washing capabilities are limited or non-existent.

TECHNICAL SHEET

Available for the following cage types, either sterile or not sterile:

1145T
1284L
1285L
GM500
GM500P
1245ISO
1290D
1291H
GR900

Material:

APET - FDA approved

ISO-9001
Cert. n° 0875

ISO-14001
Cert. n° 0256A/0
