

The Tecniplast IVC Review

Tecniplast and Cambium Development are delighted to bring you a bespoke review looking at our current working practices and approaches to IVCs - **The Tecniplast IVC Review**. The aim of the review is to provide delegates with an understanding of how they can improve working practices within their animal units.

Timings and venue: The review will take place at your facility at a time convenient to yourself

Cost: Price upon application

*Includes a £10 donation to the Animals in Science Education Trust

Dates: To fit into your schedule and programme of work

Want to review your team's current working practices and approaches to working IVCs and seek out refinement? Then try the 'Tecniplast IVC Review' assessment day...

The Tecniplast IVC Review is more bespoke to the client and involves an assessment of current working practices and SOP adherence within your facility over the working day. This is followed by a recommendation of modules required per technician or technician team based on any areas of inconsistency or weaker understanding. Subsequent delivery of these modules can be either in the work place (with animals) or remotely (without animals), the former being more beneficial if possible.

We aim throughout each course to ensure a clear link is established in the technician's mind between what the IVC can achieve, how it does and the technicians'/users role in ensuring the benefits are optimised for the animals, themselves and for the science they support in their work. The depth of detail presented in terms of problem solving is appropriate to the level of the course.

To find out more about this tailor made course, please contact **Noleen** on **0345 050 4556** or email info@tecniplastuk.com
