

Train the Trainer Course in Tecniplast IVCs

Tecniplast and Cambium Development are delighted to bring you the 'Train the Trainer Course in Tecniplast IVCs'. The aim of the course is to ensure that the technicians caring for the animals in IVC systems and the managers supervising those areas and teams are fully conversant with the safe & optimal use of IVCs.

Timings and venue: 9:00 - 16:30, Tecniplast UK

Cost: Price upon application, to include all course materials, lunch and refreshments

*Includes a £10 donation to the Animals in Science Education Trust

Dates: TBC

Benefits to your facility

This course will ensure attendees understand how to plan and deliver an effective training session, taking into consideration the learning style of their trainee and specifically focussed on achieving the trainee's development and competency in using IVC equipment within their facility.

Topics covered

- Pedagogy vs Andragogy
- Learning styles
- Training Approaches
- Planning & Delivering a Training Session
- Application to Competency in IVCs at CBS

The course format includes PowerPoint presentations to visualise and present key concepts. Attendees will engage in a series of discussions as well as completing individual, pair and group exercises. These are designed to actively promote consideration of learning styles, approaches to training others and planning, preparing and delivering a training session. Practical work will be undertaken on the model of equipment that the attendees use at their site using as close to the daily routine set up as is practically possible to achieve. The aim is to stimulate the conditions they will train others in. At the end of the course a resource pack will be provided to support the learning undertaken during the day.

By the end of the course delegates will have:

- Completed a 'test' paper on IVC equipment, routines and procedures followed by group discussion of answers
- Learnt the difference between Pedagogic and Androgogic training
- Reviewed own learning style and learnt about different learning styles and the impact of this on planning of training materials and approach
- Discussed and reviewed the barriers to people learning, what qualities make a good trainer.
- Covered the essential elements of a training/lesson plan and delivered this training session on available IVC system equipment and been peer reviewed against a set of given criteria.

If you would like any further information or to book delegates onto this course then please contact Isla on **0345 050 4556** or by email isla@tecniplastuk.com
