

Cambium Development and Tecniplast IVC Training

Advanced Course in Tecniplast IVCs

Tecniplast and Cambium Development are delighted to bring you our Advanced Course in Tecniplast IVCs. This course is designed to provide experienced Animal Technicians and Managers with the ability to recognise problems and problem solve, as well as providing a fully refreshed and up to date working knowledge of IVC equipment as a whole system.

This course is now available face to face.

Benefits to your Facility:

This course focusses on the principles of the IVC system, the best working practices to achieve optimal performance and the highest standards of in-cage environment and welfare. It will encourage and guide your experienced technicians to actively apply knowledge and logical thinking to preempt, prevent and problem solve issues that may impact animal health and welfare within IVC systems.

Topics covered:

- ▶ Key concepts and benefits of IVC systems
- ▶ The IVC systems, its components, function, and performance indicators
- ▶ Best working practices to optimise performance
- ▶ Risks associated with incorrect working practices, solutions to resolve, and preventative strategies

The course format is interactive and uses andragogic teaching approaches to maximise learner participation and outcomes. The course material is presented in bitesize topic related sections with video, animations, question and answer, and breakout sessions throughout the course. A detailed Resource Pack is provided to support the learning undertaken. Attendees will be assessed, and a Feedback Report provided for their Line Manager.

By the end of the course, delegates will be able to:

- ▶ Review the objectives of using IVC systems to house animals
- ▶ Describe and demonstrate the working practices essential for optimal performance of an IVC system
- ▶ Fault find and problem solve within the IVC system
- ▶ State the functions and features of individual components, their interrelation and correct performance of the system as a whole
- ▶ Recognise poor working practices, state the risks associated with these and provide preventative solutions

Course date:

12th September 2023
9.00am - 16.30pm
