

Cambium Development and Tecniplast IVC Training

Foundation Course in Tecniplast IVCs

Tecniplast and Cambium Development are delighted to bring you our 'Foundation Course in Tecniplast IVCs'. This course is aimed at trainee technicians and is designed to provide a thorough introduction to Tecniplast IVCs and their correct and optimal use.

This course is now available face to face.

Benefits to your Facility:

This course focuses on the principles of IVCs, why we use them and how they optimise animal health and welfare, staff protection and the quality of science. On successful completion of the course, each delegate will be competent in using Tecniplast IVCs safely and effectively, with knowledge and skills that will support them in their workplace.

Topics covered:

- ▶ Key concepts of IVCs
- ▶ Animal health and welfare
- ▶ Technician safety
- ▶ Environmental consistency
- ▶ IVC equipment features and functions
- ▶ Optimal working practices

The course format is interactive and uses andragogic teaching approaches to maximise learner participation and outcomes. The course material is presented in bitesize topic related sections with video, animations, question and answer, and breakout sessions throughout the course. A detailed Resource Pack is provided to support the learning undertaken. Attendees will be assessed, and a Feedback Report provided for their Line Manager.

By the end of the course, delegates will be able to:

- ▶ Recognise the causes of work-related illness in animal technicians and demonstrate knowledge of working practices to avoid them
- ▶ Describe how environmental consistency impacts animal health and welfare and science quality and demonstrate the checks needed to maintain it
- ▶ Undertake safe and effective working practices with IVC equipment to optimise its benefits
- ▶ Explain what IVC equipment achieves and how it functions
- ▶ Explain the importance of animal health and welfare and recognise the measures we take to protect and maintain it
- ▶ State the causes of ill health in animals, understand the protective barriers put in place and identify how IVC equipment fits into this strategy

Course date:

1st June 2023
9:00am - 16:30pm
